There are many criteria that determine the prestige, thinking, culture of the state and society. But the criterion that reflects the spiritual perfection of any nation and people as a mirror is the attitude of society towards women.

Our President Shavkat Mirziyoev said, " as we remember the past, among our ancestors, Jahangir grandfathers, who have made a huge contribution to the development of World Science and culture, have given birth and brought up such great people with Love, encouraged them to great deeds, and rightly proud of our fozila women, who are camarabasta in every work! Our wise people have always lived

in honor of women, living in high esteem for women has become a long-standing value inherent in our country.” - the same fact of their opinion.

” Raising the status and role of women in society is one of the priority and main directions of our statehood, " the statement itself indicates how important the issue of women is in our country. In our country, a national mechanism is successfully working on the construction of state and Society of women, strengthening their place in the family, in which women's employment, active participation in socially useful work are established. In order to strengthen the women's movement in Uzbekistan, to establish the place of Uzbek women in society, to show the world that the talent potential of Uzbek women is high, our government has issued a number of important documents. Moreover, it is also natural that in the new parliament of our country, which today finds its place in the international arena and is recognized by world politicians, it is women who have their place, position, level.

In particular, in accordance with the decree of the president of the Republic of Uzbekistan dated February 2, 2018 “on measures to radically improve activities in the field of supporting women and strengthening the institution of the family” PF-5325, increasing the socio-political and social activity of women in our country, creating conditions for their realization of their abilities and capabilities in, large-scale work is being carried out on strengthening the Family Institute.

The position of the family in society and social life is determined by the woman who is the Educator of this family. After all, a woman who is considered a new generation educator, her consciousness and thinking are formed in the family, and the first concepts of national ideology are also formed in a family that grows up and grows up. With this in mind, the exemplary behavior of the mother in the family, spiritual and spiritual etiquette, good upbringing, experience and exactingness in raising a child, plays an important role in the growth of children from an early age into polite, intelligent and comprehensively civilized.

A woman is also a foster mother in the family and society. Love for the motherland first begins with the attitude towards the parents, brothers, close relatives and those around them. The longer the family has a parent with their children, the more interactions, the more knowledge taught, and the more spiritual values lead to the strengthening of the sense of affection.

Today, women of our country are actively involved in all spheres of life – science, education, sports, medicine, entrepreneurship, production, agriculture, culture and art. It is natural that their ambition, purpose, position in society are also unique and varied. It is necessary to carry out large – scale work on increasing the socio – political activity of women, developing the legal, political, cultural and educational level.

They can be carried out in the following process of activity:

- to firmly defend the rights and interests of women in society, to fight to end any manifestations of women's discrimination;
- active participation in the work of ensuring the protection of family, motherhood and childhood;
- Organization of permanent lawyers ' advice on the provision of legal services to women in places;
- to expand the scope of conversations on spiritual and educational, religious, moral topics, organize evenings with famous figures of literature, art, science, establish the introduction of educational activities on the premises aimed at raising the legal and political consciousness of women;
- to attract women to the service sector and entrepreneurship, especially in rural areas, in order to effectively address the issues of employment of women.
- extensive media coverage of active women's activities in the social, political, economic and cultural life of the country;
- to identify, select, involve in the life of political parties, prepare politically and assist in the conduct of the activities of the general public in places, communities.

In short, in society, the state is manifested as the chief reformer in relation to the protection of female dignity, her rights and freedoms. Already, the issue of expressing the rights and interests of women in society, further increasing the role and role of women in state and society relations, protecting their interests in the political, legal, social spheres is one of the main conditions for the formation of the third Renaissance generation in New Uzbekistan.
