Annotatsiya:

Ushbu maqolada o'zbek xalqining millat sifatida shakllanishi, O'zbekistonni dunyoga tanitgan qomusiy allomalarimiz, milliy g'oya, milliy g'urur, milliy g'urur, milliy g'urur, milliy g'urur, milliy g'urur, bugungi kundagi xalqaro maydondagi g'oyaviy, mafkuraviy, axborot kurashlari, himoya istiqlol, qadrlash, ulug'lash, vatanparvarlik va unga xizmat qilish haqida so'z yuritiladi.

Kalit so'zlar: millat, milliy mafkura, milliy g'urur, milliy g'urur, vatanparvarlik, umuminsoniy.

INTRODUCTION

It is known that every people, nation has its own unique and inimitable artifacts, that is, its own historical heritage, traditions and customs. Whether it is a chain of times, the politics of different regimes, a change in the worldview of people under pressure, attention to the spiritual wealth that has come down to us over the centuries is fading.

In the formation of the Uzbek people as a nation, it was important to recognize the spiritual identity of this nation and strive for it. The statue of our compatriot Ahmed al-Fargani stands on a peninsula near the Nile River, the world would not recognize the Uzbek nation as it is, if it were not for al-Zamakhshari, and it was recognized by the Arabs, and our other scientists put spirituality above materiality. The wind of independence opened the gates of this bright path of goodness. In particular, one of the topical issues of our time was the introduction of the Uzbek model and mentality into the consciousness and consciousness of our people and youth.

If we want to glorify Uzbekistan to the world, glorify its ancient history and bright future, if we want to keep it forever in the memory of generations, we must first of all educate great poets and great artists. Why, as the great writer Chulpon said, if literature lives, the nation lives. ³ As noted, especially literature has a great potential in forming a sense of patriotism among young people.

Therefore, the intention of literature is goodness, and its motto is freedom. These qualities can be found and promoted in every work in it.

For example, the transformation of an uneducated child into a father killer as shown in Makhmudhoja Behbudi's drama "Padarkush", the hero of Fitrat's drama "Abulfayzkhan" Ibrahimbi and the determination of a patriot, just person to eternity, A. By explaining the characters of Yusufbek Khoji, Otabek, and Mirzo Anvar in Qadiri's novels "O'tgan kunlar", "Mehrobdan chayon", by emphasizing that they did not back down from their intentions in any situation - they protected the interests of the country, it is possible to sow the seeds of many good qualities in the hearts of the young generation. In any case, with the help of such propaganda methods and tools, it is possible to open the eyes of not only young people, but also parents, brothers, and the whole society, who do not pay attention to what their children are doing today, and ruin tomorrow.

After our country achieved prosperity, it became the main task to carry out spiritual processes consistently, to instill in the minds of our people, especially the young generation, the feelings of love for the motherland, gratitude for the hard-won independence, feelings of loyalty, and self-awareness.

When it comes to national ideology, national pride, national pride, first of all we need to solve the problems of forming this feeling in young people, or to establish a healthy attitude in the hearts of our children towards this Motherland, our rich history, the holy religion of our ancestors, so to speak, their ideological it is necessary to strengthen immunity.

MATERIALS AND METHODS

It can be seen from this that in order for our Republic to go faster on its development path, it will be necessary to raise the morale of the people, the way of life, and the national pride. It is known that a morally backward country can never become a great country. So, the fate of development is decided by spiritually mature people. Spiritual maturity cannot be imagined without patriotism.

Patriotism in the peoples of the East means, first of all, loving one's homeland, people, soil, realizing their essence, and solving the great tasks before them. At present, in the complex and dangerous period in which ideological, ideological, and informational struggles are intensifying in the international arena,

the main task is to organize promotion of the national idea and increase the efficiency of spiritual and educational work based on the requirements of the time.

“It is necessary to protect our youth from various ideological attacks, to form the conscious attitude of our compatriots to life, to increase the sense of attention to the events happening around them”¹, - said our first president I.A. Karimov. After all, it is the duty of each of us to consistently fight and always be ready against the aggressions that can cause the independence of our country and our peaceful life.

That is why, in a time when various ideological processes are emerging along with development, we must strengthen national thinking and a healthy worldview in the hearts of our youth, make them strong-willed, selfless and patriotic people who are able to live consciously, have their own opinion, and stand firm against various spiritual aggressions. Education is an urgent problem today.

This requires the creation of modern information technologies and mechanisms that ensure the effectiveness of propaganda of the national idea, and the need to strengthen the ideological immunity of our youth. For this, it is extremely necessary to develop its effective methods, to deeply reveal the nature of ideological attacks such as fanaticism, extremism, and terrorism, which are contrary to our way of life.

“In order to strengthen the ideological protection of our youth, we must increase the role of mass media, publicize the activities of the Republican Councils of Spirituality and Enlightenment responsible for this field, keep pace with our people, increase their worldview every day, if necessary, every hour, explain the meaning of spirituality to the ancient roots of our national spirituality. It is necessary to explain in detail about our great ancestors”². Also, it is extremely important to hold lectures, question-and-answer evenings, conversations, discussion evenings, meetings with advanced people, heroes of our country, labor veterans, and other similar educational events aimed at fully revealing their place and importance in our lives.

RESULTS AND DISCUSSION

It is the demand of today's era to inculcate in their minds the concepts of parentage, neighborhood cooperation, respect for the deprived, respect for the elderly, honor for the little ones, sacred feeling, national pride, and concepts related to the education of a perfect human being in effective ways.

As our first president said, “We should enter into a debate with only ideas against ideas, only ideas against ideas, and only enlightenment against ignorance.” Today, international life and personal development have entered such a stage that now not military power, but intellectual potential, intelligence, thought, and advanced technologies are of decisive importance. If we support the famous expression of our grandfather Amir Temur: “Strength is in justice” in relation to today, I would add to it, “Strength is in knowledge and thinking”.³

Therefore, the issue of promoting the national idea is aimed at educating people in the spirit of respect and tolerance for their Motherland, strengthening a healthy lifestyle in society, and an environment of mutual kindness. Let him point out that every citizen of this country who calls himself Uzbek should act together and live with feelings of national pride and national pride in their hearts. Only then will we

have fully fulfilled the task we have set before us. No force can turn us away from our chosen path, as long as protecting independence, valuing it, glorifying it, patriotism, and serving it become our consciousness and creed. Therefore, the belief of patriotism should be absorbed into the blood of each of us, and it should be passed on to the future generations as a sacred heritage.
